

Part Number: K-ZX14-6-CDS

Description: Canyon Dual Sport Saddle

Fitment: 2006 Kawasaki Ninja ZX14

Revision: 1

Tools Required	Parts List
Philips Screw Driver 10mm Open Wrench 12mm Socket or Combination Wrench	

1. Remove your stock seat. Refer to your owner's manual if necessary.
2. Saddle mounts just like stock with brackets preinstalled on the saddle. You may need to adjust them slightly to match the lock mechanisms for proper latching, sometimes this takes a little patience. Once adjusted, tighten them securely and you're ready to go.

3. To install your Canyon Dual Sport saddle, slip the two front tongues of your saddle under the two brackets at the rear of the gas tank, align the corbin bracket to the stock bracket and push down on the saddle until you hear the lock click. (Figure 1)

NOTE: If you will be using the rider's backrest, install it before latching seat to bike. There is a safety screw that must be installed and you cannot reach it with the seat mounted on.

4. Works in the two-up configuration with the Kawasaki passenger grab rail or with your factory seat cowl installed. (Figures 2 & 3)
