

**Part Number:** V-VSN-7-SMUG(E)

**Description:** Smuggler Trunk

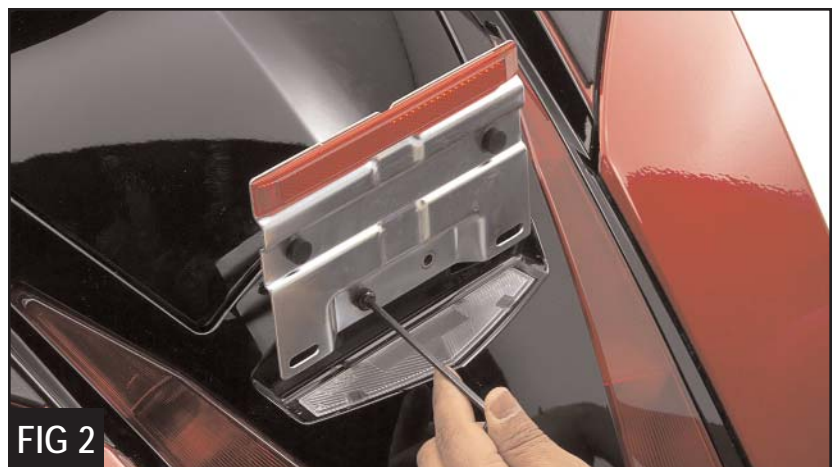

**Fitment:** 2007-2013 Victory Vision

**Revision:** 2

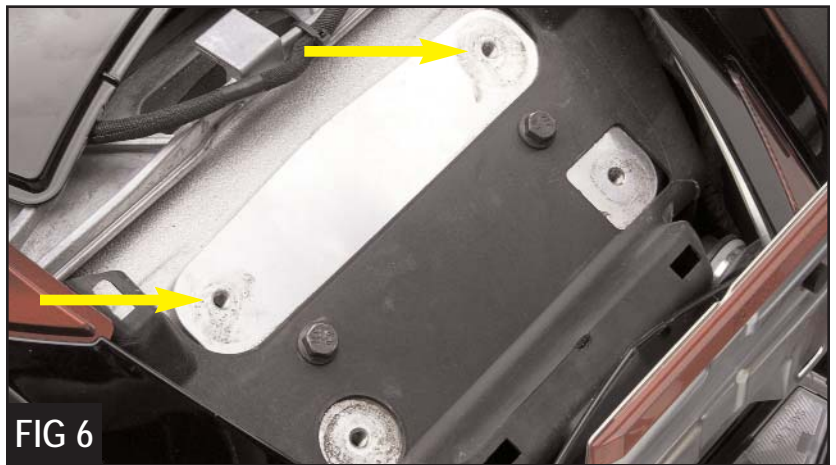

Tools Required	Parts List
5mm Allen Wrench	2 8mm x 1.25 Chrome Button Head Allen Bolts 2 8mm Chrome Flat Washers

1. Remove your stock seat. Refer to your owner's manual if necessary.
2. Corbin's Smuggler Trunk setup installs easily on your bike using existing positions on your bike. All installation hardware is included so your new saddle is ready to go right out of the box. Seat heaters work with stock Victory wiring.
3. Remove your license plate and frame (Figure 1).
4. Remove your license plate bracket by using a 5mm Allen wrench (Figure 2).
5. Open saddlebags and unclip the side plastic panels (Figure 3).
6. Unclip top plastic panel (Figure 4).
7. If you bought the Smuggler Trunk setup with heat, plug the wiring harness in now.
8. To install your new Smuggler Trunk setup, put the saddle in position and secure the front (Figure 5) using your stock bolts. Secure the smuggler trunk, using the supplied chrome button head Allen bolts and flat washers, using a 5mm Allen wrench (Figures 6 & 7).
9. Reinstall the plastic side panels and close the saddlebag lids.
10. Reinstall the license plate bracket, plate and frame.

11. The heater is controlled by the switch along the side of the saddle. Temperature will be controlled by an internal thermostat. Heat will only operate when motorcycle ignition is ON and takes a couple minutes to warm up.
