## Installation of Mustang Seat:

**Note:** For easiest installation, Mustang recommends re-installing the trunk *after* installing the seat. Mustang's seat does not utilize the two side mounts, so the side covers can be re-installed at any time.

1. Position the seat onto the frame. Connect the heater cable.

2. Remove the trunk lighting harness cable from the bottom of the stock seat. Connect the cable to the Mustang seat. Route the cable through the cable clips on the bottom of the passenger area of the Mustang seat and connect to the plug on the bottom of the trunk.
3. Ensure the front brackets of the seat engage the mounts toward the front of the motorcycle.

4. Push the seat fully forward until the rear bracket aligns with the fender mount and, using a 5mm Allen wrench, secure to the fender with the stock rear screw, grommet and washer. Indian recommends torquing this bolt to 8 ft-lbs (96 in-lbs, 10.8 Nm).

**Note:** To access the rear mount when the trunk is installed, release the trunk mount and pivot it forward. Brace the trunk or have a helper hold it up, and reach under the trunk to access the rear mount.

**Enjoy the comfort and custom look of your new Mustang seat!**

These steps are guidelines to help you install your new Mustang product. If you need further assistance, please call us at 800-243-1392 or 413-668-1100, Monday through Friday 9:00 - 5:30 Eastern or send an e-mail to [questions@mustangseats.com](mailto:questions@mustangseats.com) or visit our website at [www.mustangseats.com](http://www.mustangseats.com).

For care and maintenance of our seats, please go to our website under "Support".
