

# NEW RAGE CYCLES

## INSTALLATION INSTRUCTIONS

### KTM SUPERDUKE 1290

#### FENDER ELIMINATOR 2020

- 1 Remove stock seats from bike
- 2 Remove 4 bolts holding on stock tail section using either a 8mm socket or T30 torx (Photo 1)
- 3 Slide grommet cover off and unplug 4 pin connector while also popping out rubber grommet (Photo 2)
- 4 Take new fender eliminator, slide harness through grommet hole (installing new grommet in its place) and use provided M6 nuts to mount kit into place. Clip off zip tie first as this is attaching the license plate bracket to the fender eliminator.
- 5 Plug connector in and test everything
- 6 Mount your license plate
