FITTING INSTRUCTIONS

- Firstly, cut the supplied self-adhesive foam strips (**Item 2**) into thin 10mm wide strips.
- Apply the foam strips to the back side of the radiator guard, making sure they are evenly spaced out around the border of the radiator guard.
- Using either a spanner or a socket set, remove the OEM radiator bolts starting with the bolt marked in red in **Picture 1**, then remove the two upper mounting bolts seen in **Picture 2**, set these bolts to one side for later use.
- Offer the R&G radiator guard (**Item 1**) up to the radiator (**Picture 3**), push the two upper mounting bolts through the radiator guard and loosely thread into the upper mounts.

Please note:

To avoid cross threading apply pressure to the bolt head while turning counter-clockwise until a click is heard, then begin turning clockwise to tighten.

- The radiator guard should now hang freely from the top two mounts, allowing you to push the lower mounting bolt through the radiator guard and into the lower mounting point.
- Once all three bolts pictured in **Picture 4** have been loosely threaded into the mounting points, you may now tighten the bolts down evenly one by one.

ISSUE 1 - 22/12/2021 (TB)

**CONSUMER NOTICE**

The catalogue description and any exhibition of samples are only broad indications of the Products and R&G may make design changes which do not diminish their performance or visual appeal and supplying them in such state shall conform to the order. The Buyer acknowledges no representation or warranty (other than as to title) has been given or will apply to the Products other than those in R&G's order or confirmation and the Buyer confirms it has chosen the Products as being of merchantable quality and suitable for its particular purposes. Where R&G fits the Products or undertakes other services it shall exercise reasonable skill and care and rectify any fault free of charge unless the workmanship has been disturbed. The Buyer is responsible for ensuring that the warranty on the motorcycle is not affected by the fitting of the Products. On return of any defective Products R&G shall at its option either supply a replacement or refund the purchase money but shall not be liable if the Products have been modified or used or maintained otherwise than in accordance with R&G's or manufacturer's instructions and good engineering practice or if the defect arises from accident or neglect. Other than identified above and subject to R&G not limiting its liability for causing death and personal injury, it shall not be liable for indirect or consequential loss and otherwise its liability shall be limited to the amounts paid by the Buyer for the Products or the fitting or service concerned. These terms do not affect the Buyer's statutory rights.

R&G RACING RETURNS POLICY (NON-FAULTY GOODS)

Returns must be pre-authorized (if not pre-authorized the return will be rejected). Goods may only be returned direct to us if they were purchased direct from us (customer must prove if necessary). Otherwise to be returned to original vendor. Goods must be in re-sellable condition, in the opinion of R&G Racing. All returns are subject to a 25% restocking and handling fee (25% of the gross value exc. P&P – at the prevailing price at time of purchase). The customer must pay any and all carriage charges. No returns of discontinued products, unless within 14 days of purchase. This policy does not affect your statutory rights and does not refer to faulty goods.

ARTICLE 2	100mm BANDEAU DE MOUSSE AUTOCOLLANT	3

PHOTOS DE MONTAGE

Photo 1

Photo 2

Photo 3

Photo 4

NOTICE DE MONTAGE

- Dans un premier temps, découpez les bandes de mousse autocollante fournies (Article 2) en fines bandes de 10mm de large.
- Appliquez les bandes de mousse à l'arrière de la protection radiateur, en veillant à ce qu'elles soient uniformément espacées autour du bord de la protection radiateur.
- À l'aide d'une clé ou d'un jeu de douilles, retirez les boulons de radiateur d'origine en commençant par le boulon marqué en rouge sur la photo 1, puis retirez les deux boulons de montage supérieurs visibles sur la photo 2, mettez ces boulons de côté pour une utilisation ultérieure.
- Présentez la grille de protection radiateur R&G (Article 1) sur le radiateur (Photo 3), poussez les deux boulons de fixation supérieurs à travers la protection radiateur et vissez-les sans serrer dans les supports supérieurs.

Note :

Pour éviter le filetage croisé, appliquez une pression sur la tête du boulon tout en tournant dans le sens inverse des aiguilles d'une montre jusqu'à ce qu'un clic se fasse entendre, puis commencez à tourner dans le sens des aiguilles d'une montre pour serrer.

- La protection radiateur doit maintenant pendre librement des deux supports supérieurs, ce qui vous permet de pousser le boulon de montage inférieur à travers la protection radiateur et dans le point de montage inférieur.
